

## ABEES Planning Base Map

Here is a Garmin Base Planning file that will make it easier for you to plan your ABEES routes and find the POI locations for the major categories listed below. You can either design your own routes on the Panning file or copy and paste routes from our website to the Base Planning file. After your route is entered on the Base Planning file, you can easily see the ABEES locations that are close to your planned route and then adjust the route to take you to those locations. Be sure to save your route to another file and then delete the route that is on your Base Planning File.

<b>POI</b>	<b>Symbol</b>
